SUMMARY

CS student (CGPA: **9.63**, grad. **2027**) with hands-on experience in **Agentic AI**, **LLM-powered application development**, and **production-grade backend systems**. Built multi-agent AI systems using **LangGraph**, **LangChain**, and **LiteLLM**; implemented end-to-end **RAG pipelines** with **ChromaDB** vector databases, embedding models, chunking strategies, and semantic retrieval. Delivered **enterprise-grade backend platforms** with **Java Spring Boot**, **Nodejs**, **PostgreSQL** (90+ table schemas), and **AWS** deployments. Strong foundation in **data structures & algorithms**, **OOP**, **system design**, and **computer networks**.

TECHNICAL SKILLS

Languages: Python, Java, TypeScript, JavaScript, SQL, C, C++, Shell Scripting

Agentic AI & LLMs: LangChain, LangGraph, LiteLLM, Multi-Agent Orchestration, Agentic Workflows, LLM Tool-Calling, MCP (Model Context Protocol), Prompt Engineering, Instruction Prompting, System Prompting, Grounding

RAG & Vector Search: Retrieval-Augmented Generation (RAG), ChromaDB, FAISS, Embedding Models, Chunking Strategies, Semantic Search, Vector Databases, Retrieval Pipelines

NLP & ML: spaCy, NER, Hugging Face Transformers, PyTorch, Scikit-learn, Multi-class Intent Classification, XGBoost

Backend & Full-Stack Development: Java Spring Boot, Spring Security, FastAPI, Django, Node.js, Express.js, React 18, Next.js, REST API Design, JWT Authentication, RBAC, OAuth, Async Python, Pydantic

Databases: PostgreSQL, MySQL, MongoDB, Redis, Prisma ORM, Flyway (migrations), ChromaDB, FAISS, SQL Schema Design, Indexing, Data Modelling, ETL Pipelines

Cloud & DevOps: AWS (EC2, S3), Microsoft Azure (Data Factory, Blob Storage), Docker, Kubernetes, Jenkins, GitHub Actions CI/CD, Linux, Vercel, Railway

Tools & Practices: Git, GitHub, Pull Requests, Code Reviews, Postman, Jupyter Notebook, VS Code, Agile/Scrum, SDLC, System Design, Technical Documentation, API Specifications

CS Fundamentals: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Computer Networks

EXPERIENCE

Backend Developer Intern

Jan 2026 – Apr 2026

Seventh Ray LegalTech – B2B SaaS Contract Lifecycle Management

Remote

- Developed and deployed a **Java Spring Boot** backend following **SDLC** best practices for an enterprise **Contract Lifecycle Management** platform; designed a **PostgreSQL** relational schema across **90+ tables** covering contracts, parties, templates, approvals, compliance, and audit logs with **Flyway** for version-controlled migrations.
- Built **RESTful APIs** for **7+ core modules** (Parties, Contracts, Toolkit Library, Calendar, file sharing) with full **CRUD** coverage; implemented **JWT-based stateless authentication** via **Spring Security** with **RBAC** supporting **8 user roles** and workspace-level data isolation.
- Deployed on **AWS EC2** (instance provisioning, security groups, DB migration); configured **AWS S3** for secure document management; authored comprehensive technical documentation including architecture design, **API specifications**, DB schema, and an **8-week Agile sprint plan**.

AI Engineering Intern

June 2025 – Aug 2025

Textify Analytics (AI Search Engine | Top 40 Global Startups G20 2023 | Google GenAI Finalist 2024)

Remote

- Built and maintained **ETL data pipelines** on **Microsoft Azure** (Data Factory, Blob Storage) to ingest, clean, and transform large-scale document and chart datasets feeding a multimodal AI search engine processing **1M+ documents monthly**; leveraged cloud-native automation workflows for scalable data ingestion.
- Implemented **data extraction and retrieval workflows** handling structured and unstructured sources (PDFs, images, charts) using **Python** and **REST APIs**; optimized pipeline throughput for downstream ingestion into an AI retrieval backend powering natural language search across a **3M+ chart dataset**.

PROJECTS

AI Resume Analyzer | LiteLLM, LangChain, spaCy NER, ChromaDB, FastAPI, Supabase, Docker

2026

- Architected a **multi-agent AI platform** orchestrating specialized LLM agents via **LiteLLM** for PDF/DOCX parsing, work-history summarization, and skill taxonomy normalization; applied **instruction prompting** and **system prompting** (grounding) strategies to ensure reliable, structured agent outputs validated with **Pydantic** schemas and **spaCy NER** pipelines for candidate profile extraction.
- Built a **semantic matching engine** using **ChromaDB** vector store with embedding model ingestion and chunking strategies for **RAG-powered** candidate-to-JD scoring; exposed via **FastAPI REST API** with **Supabase (PostgreSQL)** persistence and **LLM tool-calling** for gap analysis – achieving **sub-200ms query performance**.

AI Email Automation System | Python, LangGraph, LangChain, RAG, ChromaDB, FastAPI, Gmail API, Webhooks

2026

- Built a **production-grade agentic AI system** using **LangGraph** stateful workflows for multi-class intent classification and dynamic multi-step task orchestration across **5+ intent categories**; applied **instruction prompting** and **system prompting** to govern agent behavior; integrated **Gmail API** for real-time email ingestion via **webhooks** and automation workflows.
- Implemented a full **RAG pipeline**: document chunking, embedding model ingestion into **ChromaDB** vector database, and semantic retrieval for context-aware LLM-powered response generation; deployed scalable **REST APIs** via **FastAPI**; containerized with **Docker** and automated with **GitHub Actions CI/CD** – achieving **90%+ classification accuracy**.

PayZen – Shared Expense & Payments Platform | Next.js, Prisma ORM, PostgreSQL, Supabase, Stripe, Auth.js

2026

- Built a **full-stack fintech platform** serving **100+ active users** with wallet provisioning, group ledgers, split expense tracking, and real-time settlement suggestions; integrated **Stripe Checkout API** for secure payments and **multi-provider OAuth** with **Auth.js**; deployed on **Vercel** with **Next.js App Router** for server-side rendering and SEO-optimized architecture.
- Designed modular **TypeScript** codebase with **Prisma ORM** for type-safe data access against a normalized **PostgreSQL** schema; implemented **indexing strategies** for sub-200ms query performance; collaborated via Git pull requests and code reviews following **Agile** practices.

EDUCATION

Pandit Deendayal Energy University

Gandhinagar, Gujarat

B.Tech in Computer Science Engineering | CGPA: 9.63 / 10.0 | No Active Backlogs

July 2023 – May 2027 (Expected)

CERTIFICATIONS

DeepLearning.AI ML Specialization | Hugging Face NLP Course | IBM AI & Cloud Internship [\[link\]](#)

AWS Cloud Practitioner | Google AI Essentials [\[link\]](#) | IBM AI Fundamentals [\[link\]](#)

ACHIEVEMENTS

- 1st Runner-up**, Breach'25 Hackathon (48-hr) at PDEU | **Top 50 / 500+ teams**, Level Supermind Hackathon'25, Mumbai – shipped agentic AI and ML-powered solutions under time constraints following Agile practices.
- Delivered a **1.5-hr Python libraries workshop** to **100+ students** at GFG-PDEU.
